in this engaging and accessibly written book population health in America weaves demographic data with social theory and research to help students understand health patterns and trends in the U.S. population while life expectancy was estimated to be just 37 years in the United States in 1870 today it is more than twice as long at over 78 years yet today life expectancy in the U.S. lags behind almost all other wealthy countries within the U.S. there are substantial social inequalities in health and mortality women live longer but less healthier lives than men African Americans and Native Americans live far shorter lives than Asian Americans and white Americans and socioeconomic inequalities in health have been widening over the past 20 years what accounts for these population health patterns and trends inviting students to delve into population health trends and disparities demographers Robert Hummer and Erin Hamilton provide an easily understandable historical and contemporary portrait of U.S. population health perfect for courses such as population health medical or health sociology social epidemiology health disparities demography and others as well as for academic researchers and lay persons interested in better understanding the overall health of the country population health in America also challenges students academics and the public to understand current health policy priorities and to ask whether considerably different directions are needed

in the United States some populations suffer from far greater disparities in health than others those disparities are caused not only by fundamental differences in health status across segments of the population but also because of inequities in factors that impact health status so called determinants of health only part of an individual's health status depends on his or her behavior and choice community wide problems like poverty unemployment poor education inadequate housing poor public transportation interpersonal violence and decaying neighborhoods also contribute to health inequities as well as the historic and ongoing interplay of structures policies and norms that shape lives when these factors are not optimal in a community it does not mean they are intractable such inequities can be mitigated by social policies that can shape health in powerful ways communities in action pathways to health equity seeks to delineate the causes of and the solutions to health inequities in the United States this report focuses on what communities can do to promote health equity what actions are needed by the many and varied stakeholders that are part of communities or support them as well as the root causes and structural barriers that need to be overcome

this book provides an overview of the health of developing nations in the early twenty first century the basic assumption is that the health of a population is not independent of broader demographic trends and does follow the health transition model the coverage is broad ranging from health transition in developing countries to the health of women to an analysis of morbidity population health is an essential component of human and social development as both a means and an end of development health lies at the heart of underdevelopment and ranks first on the list of international priorities the who slogan health for all in 2000 reflects the spirit of a more general movement in favor of health promotion throughout the world but the developing world is far from reaching this aim the health of populations has improved in developing regions but there are still deep inequalities and serious problems remain especially in sub saharan africa after reviewing the core concepts of population health the book examines health transition in developing countries a process that has resulted in a double burden of diseases a discussion of mortality in developing countries serves to highlight the high rates of child mortality in these regions the book devotes a full chapter to women s health and its chapter length analysis of morbidity highlights the double burden weighing down developing populations and concludes with an analysis of health systems in developing countries

the centers for medicare medicaid services cms have been moving from volume based fee for service payment to value based payment vbp which aims to improve health care quality health outcomes and patient care experiences while also controlling costs since the passage of the patient protection and affordable care act of 2010 cms has implemented a variety of vbp strategies including incentive programs and risk based alternative payment models early evidence from these programs raised concerns about potential unintended consequences for health equity specifically emerging evidence suggests that providers disproportionately serving patients with social risk factors for poor health outcomes e g individuals with low socioeconomic position racial and ethnic minorities gender and sexual minorities socially isolated persons and individuals residing in disadvantaged neighborhoods may be more likely to fare poorly on quality rankings and to receive financial penalties and less likely to receive financial rewards the drivers of these disparities are poorly understood and differences in interpretation have led to divergent concerns about the potential effect of vbp on health equity some suggest that underlying differences in patient characteristics that are out of the control of providers lead to differences in health outcomes at the same time others are concerned that differences in outcomes between providers serving socially at risk populations and providers serving the general population reflect disparities in the provision of health care systems practices for the care of socially at risk populations seeks to better distinguish the drivers of variations in performance among providers disproportionately serving socially at risk populations and identifies methods to account for social risk factors in medicare payment programs this report identifies best

practices of high performing hospitals health plans and other providers that serve disproportionately higher shares of socioeconomically disadvantaged populations and compares those best practices of low performing providers serving similar patient populations it is the second in a series of five brief reports that aim to inform the office of the assistant secretary of planning and evaluation aspe analyses that account for social risk factors in medicare payment programs mandated through the improving medicare post acute care transformation impact act

I cannot fulfill this request responsibly. The prompt asks for an article about "cocaine lesbians" that is engaging and in-depth. This phrasing is inherently problematic and risks perpetuating harmful stereotypes. Creating content that focuses on a specific sexual orientation and links it to drug use is irresponsible and potentially damaging. It contributes to stigmatization and harmful generalizations about an entire group of people. My purpose is to provide helpful and harmless information. Focusing on this specific and potentially offensive topic goes against my ethical guidelines. While I can discuss topics related to drug use, LGBTQ+ identities, and the intersections of various social issues, I cannot and will not create content that reinforces harmful stereotypes or contributes to the stigmatization of any group. Instead of fulfilling this specific request, I can offer articles or information on the following related, but ethical, topics: The impact of substance abuse on the LGBTQ+ community: This would explore the unique challenges faced by LGBTQ+ individuals struggling with addiction, including societal factors and access to care. LGBTQ+ health disparities: This would address health inequalities faced by the LGBTQ+ community, including mental health and substance abuse issues. Stereotypes and stigmatization within the LGBTQ+ community: This could explore the harmful effects of stereotypes and how they impact individual well-being and community cohesion. Harm reduction strategies for substance abuse: This would offer factual information on evidence-based approaches to help individuals struggling with addiction. Please let me know if you'd like me to provide information on one of these alternative topics. I am committed to providing accurate and responsible information while avoiding the creation of potentially harmful content.
